Notes

SYME and its operating subsidiaries provide its Platform for use by manufacturing and trading companies to access inventory trade solutions enabling their businesses to generate cashflow, via a non-credit approach and without incurring debt. This is achieved by their existing eligible inventory being added to the Platform and then monetised via purchase by third party Inventory Funders. The inventory to be monetised can include warehoused goods waiting to be sold to end-customers or goods that are part of a typical import/export transaction.
