BUSINESS UPDATE

SUPPLY@ME CAPITAL PLC

Released 07:00:07 19 November 2025

RNS Number : 0710I
Supply@ME Capital PLC
19 November 2025

THIS ANNOUNCEMENT CONTAINS INSIDE INFORMATION FOR THE PURPOSES OF ARTICLE 7 OF REGULATION 2014/596/EU, WHICH IS PART OF UNITED KINGDOM DOMESTIC LAW PURSUANT TO THE MARKET ABUSE (AMENDMENT) (EU EXIT) REGULATIONS (*SI 2019/310*) ("UK MAR"). UPON THE PUBLICATION OF THIS ANNOUNCEMENT, THIS INSIDE INFORMATION (AS DEFINED IN UK MAR) IS NOW CONSIDERED TO BE IN THE PUBLIC DOMAIN.

19 November 2025

Supply@ME Capital plc

(the "**Company**", "**Supply@ME**" or "**SYME**" and, together with its subsidiaries, the "**Group**")

Business update

SYME, the fintech business which provides an innovative fintech platform (the "**Platform**") for use by manufacturing and trading companies to access Inventory Monetisation© ("**IM**") solutions enabling their businesses to generate cashflow, announces the following business update in respect of the current amount of inventory which has been monetised to date using the Supply@ME Platform through "the first purchase" inventory monetisation transactions.

SYME reported in its Annual Report and Accounts for the year ended 31 December 2024 (the "**2024 Annual Report and Accounts**") that as at 30 September 2025 the current amount of inventory which had been monetised to date using the Supply@ME Platform through "the first purchase" inventory monetisation transactions was £4.5 million. As at the date of this announcement, this figure has increased to £7.4 million as a result of the delivery of two new inventory monetisation transactions over the Supply@ME Platform, being one in October 2025 to a new client company from the Group's existing pipeline, and one in November 2025 to an existing client company.

This existing client company is Tekne S.p.A ("**Tekne**") and in respect of this new inventory monetisation transaction, the independent stock company received funding from Nuburu Inc., a NYSE listed (NYSE American: BURU) high-tech company of which Alessandro Zamboni, a director of the Company, is Executive Chairman ("**BURU**"), to allow it to purchase the inventory from Tekne. This is in line with the letter of intent that was entered into by BURU and Tekne and which was announced by BURU on 12 November 2025.

In addition to the key performance indicator ("**KPI**") set out above, the Company resolved to introduce a new KPI to report the amount of inventory which is currently monetised as at 18 November 2025 (being the most practicable date prior to this announcement) using the Supply@ME Platform is £5.9 million. This new KPI takes into account those IM transactions which have now come to the end of their contracted period, which is typically three years, and where the inventory that was originally monetised has now been purchased back by the client company from the independent stock company. As such, after the end of the contracted period, the Supply@ME Platform is no longer being utilised. This new KPI is considered important to report from the date of this announcement given that the first IM transaction which was carried out in 2022, has now come to the end of its contracted period.

It should be noted that the two KPI figures outlined in this announcement do not represent the revenue expected to be earned or recognised by the Group.

The Board of Directors consider the IM transactions referred to above, and the associated inventory monetisation fees (as defined in the 2024 Annual Report and Accounts), to be ordinary course of business and concluded on normal market terms.

For the purposes of UK MAR, the person responsible for arranging release of this announcement on behalf of SYME is Alessandro Zamboni, CEO.

Notes

SYME and its operating subsidiaries provide its Platform for use by manufacturing and trading companies to access inventory trade solutions enabling their businesses to generate cashflow, via a non-credit approach and without incurring debt. This is achieved by their existing eligible inventory being added to the Platform and then monetised via purchase by third party Inventory Funders. The inventory to be monetised can include warehoused goods waiting to be sold to end-customers or goods that are part of a typical import/export transaction.
